

2006: The Year of EuroPerio

Every three years, the world of Periodontology meets under the auspices of the European Federation of Periodontology (EFP). This year, EuroPerio 5 will be held from 29 June to 1 July in Madrid.

The past EuroPerio Congresses in Paris (1994), Firenze (1997), Geneva (2000) and Berlin (2003) were memorable meetings and made these Congresses the most attractive worldwide event in Periodontology.

The Congresses have also served to bring together European periodontists and inspire academics and clinicians to develop this area of dentistry further.

In Madrid, Mariano Sanz, his organising committee and all European national societies and members of the EFP will contribute together to make the EuroPerio 5 Congress even better and brighter. More than 5000 delegates from all over the world are already expected.

The scientific programme, with 120 relevant international speakers, will present the latest scientific and technological breakthroughs in Periodontology, and provide an opportunity for all to become aware of the latest advances in the field.

The commercial exhibition, with more than 100 companies, as well as the Forum for Innovations, with 50 invited speakers, will present the technology and products that are available today.

The free sessions, including 120 selected oral presentations and 520 posters, will again demonstrate the strength of European Periodontology.

Quintessence Publishing Company, as an official partner of EuroPerio 5, and the Editorial Board of PERIO will be there to meet you all and to share with you this extraordinary event.
